

EARLI SIG 27 ONLINE MEASURES OF LEARNING PROCESSES
LEARNING PROCESSES MATTER
29.11-1.12.2016. UNIVERSITY OF OULU, FINLAND

Dear colleagues,

In case you missed it (or just forgot about it due to your workload), this is a reminder that there are only two weeks left to submit a proposal to the 2016 SIG 27 Conference which will take place at the University of Oulu from November 29 through December 1, 2016.

The Conference

The SIG 27 Conference theme - "Learning processes matter" – was chosen to provide a forum that affords all EARLI members from all SIS the possibility to share and discuss the methodological and analytical ideas or challenges that we as an international research community are both interested in understanding and also need to better research and understand the learning processes we are facing. The chosen conference theme reflects an interest in (1) becoming acquainted with the current state-of-the-art as well as new, cutting-edge, approaches to measuring the processes involved in learning, (2) exchanging innovative solutions to collect and analyse data, and (3) discussing how the developing understanding can be used to design applications for supporting learning processes.

The location

The SIG 27 Conference will take place at the University of Oulu. We are looking forward to welcoming you all in Oulu, Finland: the Capital of Northern Scandinavia.
